

Single Door Entrance Systems

Smooth-Star[®] Fiberglass Entry Door Systems

LIMITED
20-Year
Warranty

Smooth-Star Entrance systems offer a smooth fiberglass surface that resists dents and will never rust. Their distinct panel detailing and stile and rail lines provide greater curb appeal than steel doors.

The designs shown in the Big L Distributors Therma Tru Smooth-Star[®] Selection guide represent the most popular selections from each of the Therma-Tru Smooth-Star[®] glass and panel collections.

The pricing shown below each design is for the following specification:

- 30", 32", 34" or 36" x 80" nominal size unpainted Smooth-Star[®] doors. Specific design size availability as noted.
- Rough opening sizes of 32 ½" (30" door), 34 ½" (32" door), 36 ½" (34" door) or 38 ½" (36" door), x 82 ½"
- The unit is prehung with (3) brasstone self-aligning hinges in a 4 ⅞" weather-stripped prime painted Frame-Defense[®] wood jamb, the door and jamb are prepped for lockset and deadbolt, a Tru-Defense aluminum sill with composite substrate and adjustable riser with a protective sill cover applied, adjustable security strike plate, and exterior brickmould casing.
- Prices do not include sales tax, locksets, delivery charges, or installation

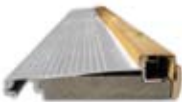

Prices and availability are subject to change without notice and are intended to give you a general guide to a broad range of design choices. Your final price may vary depending on jamb specifications, and hardware and sill options. Please call us at 800-336-2445 to get an exact detailed quotation, including installation.

Polyurethane Foam Core. Offers five times the energy efficiency of a wood door and is CFC-free.

Weatherstrip. Foam-filled compression weather-stripping remains flexible and seals your entrance against moisture and air infiltration.

Tru-Defense Sills.. High Dam design with composite threshold cap locks under the door while a flush surface provides full contact between the sweep and sill to keep water out.

Tru-Defense Corner Seal pad. It's innovative design creates a pocket that effectively prevents water infiltration.

Our BTS doorlite frames stand up to temperature extremes.

Polystyrene doorlite frames warp and turn yellow over time.

Exclusive Doorlite Frames. BTS Doorlite frames handle temperature swings and extremes without warping, splitting, cracking, or yellowing – even behind storm doors where thermal heat buildup occurs. You can paint Smooth-Star doors a dark color without worry, or compromising the warranty.

Kerfed Door bottom. Provides a tight seal. Composite top and bottom rails won't rot or warp.

Tru-Defense Door Bottom Sweep. Features dual bulbs with dual fins that sit tightly on the sill to help prevent air and water infiltration.
